

BBM 443 homework 2 - Deadline 12.12.2018 by midnight

- 1- Find the top 5 Ethereum pools and their percentage of the total network hash rate. Use web, but give the references in your answer.
- 2- Among the different wallet types, pick one of them and explain why it is better than others.
- 3- Explain how SPV works.
- 4- Explain what is "Gasprice" value used for in Ethereum transactions. Answer why Gasprice is not a fixed value, such as 1 Gas = 0.005 ether.
